

ROHIT RAJ

Software Engineer | Backend Development (Java, Spring Boot) | REST APIs | Microservices
Pune, Maharashtra, India | +91 6203272896 | rohitraj.jobs@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Specialist Programmer with 1+ year of experience designing and shipping 50+ microservices and RESTful APIs in Java and Spring Boot, cutting inter-service latency by 20% and supporting 5,000+ daily transactions. Skilled in secure backend development (JWT, RBAC), Docker containerization, and Kubernetes-based orchestration, with a strong foundation in data structures, algorithms, and full-stack development (MERN, Next.js). Solved 800+ problems across competitive coding platforms.

TECHNICAL SKILLS

Languages: Java, Python, C, C++, JavaScript, HTML/CSS, SQL

Frameworks & Libraries: Spring Boot, Spring Data JPA, Express.js, Next.js, React.js

Databases: MySQL, MongoDB

Tools & Platforms: Docker, Kubernetes, Git, GitHub, Node.js, Vercel, Render, Azure (familiar), VS Code

Practices & Concepts: REST API Design, Microservices Architecture, Agile/Scrum, CI/CD, Distributed Systems, JWT Authentication, RBAC

PROFESSIONAL EXPERIENCE

Infosys — Specialist Programmer

Pune, Maharashtra, India

Sept 2024 – Present

- Built and maintained 50+ production microservices and RESTful APIs in Java and Spring Boot, improving modularity and cutting cross-team integration defects by 20%.
- Designed JWT-based authentication and role-based access control (RBAC) for 50+ services, reducing unauthorized-access incidents by 25% and passing 2 internal security audits.
- Tuned REST API performance for inter-service communication, reducing average response latency from 220ms to 160ms (27% improvement) across distributed systems.
- Containerized 10+ Spring Boot applications with Docker, cutting environment setup and deployment time by 30% across dev, test, and production.
- Led a Kubernetes proof-of-concept for container orchestration and cluster-based scaling, projected to reduce infrastructure costs by 15% once adopted.
- Collaborated with a cross-functional team of 8 engineers via Git/GitHub and Agile/Scrum, resolving 40+ production issues and shipping 5+ features per two-week sprint.

PROJECTS

HealthCare Appointment System

June 2024

Next.js, TypeScript, Shadcn, Tailwind CSS, Twilio, Sentry

- Built a full-stack healthcare platform supporting secure registration, doctor discovery, and appointment booking for 100+ test users, cutting manual scheduling time by 30%.
- Developed admin tooling for appointment management and integrated Twilio for automated SMS reminders, reducing missed appointments by 20%.
- Integrated Sentry for error tracking and performance monitoring, and deployed to Vercel, cutting production error-detection time by 35% and maintaining 99% uptime.

chatApp – Real-Time Messaging Platform

March 2024

MERN Stack, Socket.io

- Built a real-time chat application with the MERN stack and Socket.io supporting 100+ concurrent users with sub-200ms message delivery via bidirectional WebSocket communication.
- Implemented secure authentication, session management, and persistent conversation history, achieving 99% message-delivery reliability across 50+ test sessions.
- Deployed and hosted on Render, sustaining 99% uptime for scalable, cross-device access.

EDUCATION

Indore Institute of Science and Technology, Indore

2020 – 2024

Bachelor of Technology in Computer Science and Engineering — CGPA: 8.57

B.D. Public School, Patna — CBSE, Class XII

2019 | 85%

D.A.V. Public School, Mokameh — CBSE, Class X

2017 | CGPA: 10

ACHIEVEMENTS

- Solved 430+ algorithmic problems on GeeksforGeeks across data structures and optimization techniques.
- Solved 400+ problems on LeetCode spanning arrays, trees, graphs, and dynamic programming, ranking in the top 15% of solvers.
